

Computerway Food Systems is the leader in integrated production and inventory control systems for food processing plants. With 30 years in business, CFS experts have over 100 years of cumulative industry experience.

#### Integrated Sizing Systems

Our experts use the most sophisticated technology to build the fastest and most accurate overhead sizing line controls ever built.

#### Production and Inventory Systems

Computerway's versatile and reliable systems are providing measurable returns. The HelpDesk's 24x7 technical support team is an instrumental service that no other company in the industry can offer.

## SIZING & Beyond

The Computerway [Wolf](#) and Coyote

- ` **Most Functionality**
- ` **Best Reliability and Support**
- ` **Expandable and upgrade-able**
- ` **Higher Rate of Return**

The Wolf Integrated Sizing System supports **48 Drops** and **4 Weigh Stations** per line.

Production efficiency increases with the ability to Rate Limit across multiple lines.

The Wolf Reporting options are the best in the industry with thorough and flexible options.

## PRODUCTION CONTROL

### with Computerway's R7 System

Computerway integrates software, hardware, support and experience to create effective long-term solutions for our customers.

**B15s** - Industrial touchscreen computers built in our facility, loaded with Computerway's Scale Labeling Control software and equipped with the peripheral hardware. Weigh and label finished goods with a configurable label and barcode - reporting, standardizing and traceability start here.

The application and hardware configurable options span the entire food processing spectrum, with core fundamentals:

- ` **Giveaway Control**
- ` **Standard Product Specifications.**

Customers experience production efficiency improvements with SLC stations replacing old methods of labeling finished goods. With **800+** stations in operation, this is an industry staple.

### What's New

The dSC (Digital Scale Controller) -  
A quick 30-second process  
to calibrate scales - it is FAST and  
EASY!

## INVENTORY MANAGEMENT

### RF Scanning leads to TRACEABILITY

The Computerway R7 Inventory and Shipping system is a result of 20 years of development and 100 processing plant installations. It is highly configurable with solid principles in:

- ` Serialized Tracking of Cases/Pallets
- ` Inventory Accuracy - Packaging, WIP and Finished Goods
- ` Shipping and Receiving Controls
- ` Traceability and Recall
