

Computerway Food Systems is a leader of innovation and integration in food processing plants.

Production and Inventory Systems

Computerway's versatile and reliable solutions are the best in the world. With 30 years of experience, R7 is built on these fundamental principles:

- * **Serializing Tracking: Case/Pallet**
- * **Accurate Inventory: Packaging, Inbound Eggs, Finished Goods**
- * **Shipping and Receiving Controls**
- * **Traceability and Recall**
- * **ERP Interfaces** (Accounting)

The CFS HelpDesk's 24x7 technical support is the foundation that no other company in the industry can offer.

Call or email us today to talk about your needs and schedule a visit. It's a great time to get started!

PACKAGING TRACEABILITY

Realistically keep an accurate and real-time packaging inventory, complete with audits and restocking alerts.

- + Record inbound receipts ~ vendors
- + Issue materials ~ production
- + Link materials to finished cases

Results:
Accurate Packaging and Dry Goods Inventory and Traceability

- + Assign cases to customer orders
- Results:**
Computerway Recall & Traceability!

PRODUCTION & INVENTORY CONTROL

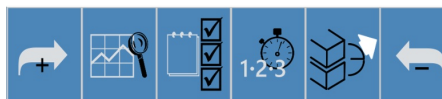

with Computerway's R7E System

Computerway integrates software, hardware, support and experience to create effective long-term solutions for our customers.

R7E functions include:

- Serialized and Non-Serialized Case Labeling
- Inbound Egg Tracking
- Production-to-order
- Palletizing operations
- Shipping and WMS functionality
- Packaging: inventory, usage and tracking
- Reporting - versatile, on demand and/or automated
- Recall and Traceability
- Connections to ERP / Accounting systems
